

CORE BITS CONCRETE, UNIVERSAL MATERIAL

FRC

Carbide milling cutter - clean, effortless removal of mortar joints

DESCRIPTION AND BENEFITS

- Designed to quickly remove mortar between bricks, blocks or stones without damaging the substrates
- Made of high-density tungsten carbide for exceptional durability, even on hard or cemented mortar
- Smooth and efficient work — rapid material removal, less physical effort
- Maximum precision: clean cut, regular joint width
- Reduced vibrations for more comfort and less fatigue
- Useful length 35 mm, total length 62 mm

MATERIALS

Brick, Cement, Mortar
