

BLADES CAST IRON, PVC, METAL

RS80

Essential for cutting large diameter steel

EN 13236

DESCRIPTION AND BENEFITS

- Special rail cutting
- Low thickness: better penetration, faster cutting, even in hard materials such as steel
- Super resistant: no more blade breakage problems
- + for the environment: reduces sparks and fragments, does not emit odours

MATERIALS

Steel, Cast iron, Rail

EXPERT ADVICE

The RS80 blades are designed to replace common abrasives for cutting steel, sheet, pipes. Thanks to their «BSL» Brazed Single Layer technology the diamonds are brazed onto the sheet in a single layer (and not randomly) = even wear, service life multiplied by 30 on average compared to an abrasive blade.
