

SURFACE PREPARATION MACHINES

USAGE

Intended for stripping and removing plaster, paint, wallpaper, covering, tile adhesive; making surfaces rough

DELIVERY CONTENT

Transport chest including:

- 1 plane
- 1 tool

JOBS

Renovation company, Painter, Plasterer, Surface Preparation

TOOLS

We recommend our grinding cups PNC100-801 or PNC100-803 for removing glue resin flexible coating and the tungsten grinding cup CB-37131 for plaster wallpaper

Planer EPF200-3

The renovation grinder with 3 grinding cups

RÉFÉRENCE	EPF200-3
CARACTÉRISTIQUES TECHNIQUES	
Engine	Electric 230 V - 1500
Diameter	100 mm
Bore	22,23 mm
Rotation speed	3000 rpm
Net weight	5,4 kg
Dimensions l x w x h	341 x 275 x 238 mm

MADE IN EUROPE

Ø 100 mm

- Extremely high efficiency thanks to three grinding cups and a large working width
- Milling depth limitation - continuously adjustable up to 5 mm max

EXPERT ADVICE

For effortless work, we recommend using the CB-3765C wall mount (max width 1600 mm; max height 2900 mm) combined with the CB-37433 balancer

Connection to the vacuum cleaner

Caliper handle, good grip

Milling depth adjustment - high position

Milling depth adjustment - intermediate position

Milling depth adjustment - low position
